CONTRIBUTION VS. INVESTMENT GROWTH BREAKDOWN

Total projected: $2,143,780

Total Contributions: $570,000 (26.6%)

Investment Growth: $1,573,780 (73.4%)

AI-ASSISTED RETIREMENT READINESS SUMMARY

Your retirement plan projects $2,143,780 by age 67 — a $143,780 surplus above your $2,000,000 goal. At 7% assumed annual return over 25 years, your current contribution of $1,500.00/month keeps you on pace. Your Retirement Readiness Score of 84/100 reflects a strong trajectory.

Your $2,143,780 projected balance is composed of $570,000 in total contributions (26.6%) and $1,573,780 in estimated investment growth (73.4%). Starting from $120,000 and contributing $1,500.00/month, the 7% assumed annual return illustrates how consistent contributions build wealth significantly over time.

Your plan is on track. Maintaining your contribution rate and avoiding early withdrawals will help preserve this trajectory. Revisit this projection annually or after any significant life change that may affect your savings rate or retirement timeline.

Retirement Goal	**$2,000,000**

DETAILED RESULTS

Projected Retirement Savings	**$2,143,780**
Total Contributions	**$570,000**
Estimated Investment Growth	**$1,573,780**
Goal Surplus	**+$143,780**
Goal Progress	**107% of goal**
Retirement Readiness Score	**84/100 (Strong)**

KEY DRIVERS / POSSIBLE ADJUSTMENTS

- Maintain your current $1,500.00/month contribution rate to stay on track.
- Avoid early withdrawals that would reduce the compounding base.
- Review this projection annually or after any significant income or expense change.
- Review whether your retirement goal still reflects your expected spending, inflation, and retirement timeline.

METHODOLOGY

What this calculator models:

- Projects savings growth using a fixed assumed annual return rate.
- Applies compounding at the selected frequency (Monthly).
- Reverse-solves the required monthly contribution (PMT formula) to reach the stated retirement goal.
- Calculates goal progress as projected savings versus the stated retirement goal.
- Computes a Retirement Readiness Score based on goal progress, time horizon, and gap size.

What this calculator does not model:

- Inflation — all values are nominal (not inflation-adjusted).
- Investment fees, management expenses, or trading costs.
- Taxes on contributions, growth, or withdrawals.
- CPP / OAS (Canada) or Social Security (USA) income.
- Pension income or other retirement income sources.
- Changes in contribution amounts over time.
- Sequence-of-returns risk or market volatility.
- Withdrawal strategy or retirement spending needs.

EDUCATIONAL DISCLAIMER

This report is for illustrative and informational purposes only. Projected retirement savings are estimates based on fixed assumed annual return rates and do not account for inflation, investment fees, taxes, government benefits, pension income, withdrawal rates, retirement spending requirements, or changes in contribution amounts over time. Actual retirement outcomes will differ materially from these projections. This report does not constitute financial, investment, tax, or legal advice. Consult a qualified financial advisor before making retirement planning decisions.
