EXECUTIVE SUMMARY

Behind Target

CA$870,432	CA$1,200,000	CA$329,568	73%	58/100
Projected Savings	Retirement Goal	Estimated Gap	Goal Progress	Readiness Score **Developing**

CONTRIBUTION VS. INVESTMENT GROWTH BREAKDOWN

Total projected: CA$870,432

Total Contributions: CA$333,000 (38.3%)

Investment Growth: CA$537,432 (61.7%)

AI-ASSISTED RETIREMENT READINESS SUMMARY

Your retirement plan projects CA$870,432 by age 65 — CA$329,568 short of your CA$1,200,000 goal (73% of goal reached). To close this gap, total monthly contributions of approximately CA$1,340.00/month would be needed — an additional CA$540.00/month above your current rate. Retirement Readiness Score: 58/100 (Developing).

Your CA$870,432 projected balance is composed of CA$333,000 in total contributions (38.3%) and CA$537,432 in estimated investment growth (61.7%). Starting from CA$45,000 and contributing CA$800.00/month, the 6.5% assumed annual return illustrates how consistent contributions build wealth significantly over time.

The highest-impact action is to increase contributions now. Each additional dollar benefits from the full 30-year compounding runway. Review your budget for monthly savings opportunities and revisit this calculator periodically to track progress.

INPUTS & ASSUMPTIONS

Current Retirement Savings	**CA$45,000**
Monthly Contribution	**CA$800.00/month**
Assumed Annual Return	**6.5%**
Compound Frequency	**Monthly**
Current Age	**35**
Retirement Age	**65**
Years to Retirement	**30**
Retirement Goal	**CA$1,200,000**

DETAILED RESULTS

Projected Retirement Savings	**CA$870,432**
Total Contributions	**CA$333,000**
Estimated Investment Growth	**CA$537,432**
Goal Gap	**-CA$329,568**
Goal Progress	**73% of goal**
Required Monthly Contribution	**CA$1,340.00/month**
Additional Monthly Needed	**+CA$540.00/month**
Retirement Readiness Score	**58/100 (Developing)**

KEY DRIVERS / POSSIBLE ADJUSTMENTS

- Increase monthly contributions: an additional CA$540.00/month closes the CA$329,568 gap by age 65.
- Start earlier: beginning contributions sooner maximises the 30-year compounding runway.
- Revisit the return assumption: a higher assumed return rate (if supported by your allocation) reduces the required contribution.
- Extend the retirement age: additional saving and compounding years can reduce the projected gap, although they may not fully close it.

METHODOLOGY

What this calculator models:

- Projects savings growth using a fixed assumed annual return rate.
- Applies compounding at the selected frequency (Monthly).
- Reverse-solves the required monthly contribution (PMT formula) to reach the stated retirement goal.
- Calculates goal progress as projected savings versus the stated retirement goal.
- Computes a Retirement Readiness Score based on goal progress, time horizon, and gap size.

What this calculator does not model:

- Inflation — all values are nominal (not inflation-adjusted).
- Investment fees, management expenses, or trading costs.
- Taxes on contributions, growth, or withdrawals.
- CPP / OAS (Canada) or Social Security (USA) income.
- Pension income or other retirement income sources.
- Changes in contribution amounts over time.
- Sequence-of-returns risk or market volatility.
- Withdrawal strategy or retirement spending needs.

EDUCATIONAL DISCLAIMER

This report is for illustrative and informational purposes only. Projected retirement savings are estimates based on fixed assumed annual return rates and do not account for inflation, investment fees, taxes, government benefits, pension income, withdrawal rates, retirement spending requirements, or changes in contribution amounts over time. Actual retirement outcomes will differ materially from these projections. This report does not constitute financial, investment, tax, or legal advice. Consult a qualified financial advisor before making retirement planning decisions.
