EXECUTIVE SUMMARY

Low Liquidity

CA$509,000	CA$668,000	CA$159,000	68/100	5.2% liquid
Net Worth	Total Assets	Total Liabilities	Health Score	Liquidity
			Good	Low

ASSETS VS LIABILITIES

Total projected: CA$827,000

Total Assets: CA$668,000 (80.8%)　Total Liabilities: CA$159,000 (19.2%)

AI-ASSISTED NET WORTH SUMMARY

Your balance sheet shows total assets of CA$668,000 and total liabilities of CA$159,000, resulting in a net worth of CA$509,000. Debt-to-asset ratio: 23.8%. Liquid assets represent 5.2% of total assets. Net Worth Health Score: 68/100 (Good).

Asset breakdown: Cash & Savings CA$35,000 + Investments/Retirement CA$95,000 + Home/Real Estate CA$520,000 + Vehicles/Other CA$18,000 = CA$668,000. Liabilities: Mortgage CA$155,000 + Loans/Credit Cards CA$4,000 + Other Debts CA$0 = CA$159,000. Liquidity Strength: Low (5.2% liquid assets of total).

Liquid assets are 5.2% of total assets, below the 10% reference threshold. Building CA$31,800 in additional liquid savings (cash, savings account) would reach 10% liquid. These thresholds (25% D/A, 10% liquid) are educational reference points only -- not financial advice or regulatory standards. Actual balance sheet health depends on income, cash flow, asset type, and personal goals.

DETAILED RESULTS

Total Assets	CA$668,000
Total Liabilities	CA$159,000
Net Worth	CA$509,000
Debt-to-Asset Ratio	23.8%
Liquid Assets	CA$35,000
Liquid Assets %	5.2%
Net Worth Health Score	68/100 (Good)
Liquidity Score	26/100 (Low)
Gap to 10% Liquid	CA$31,800

KEY DRIVERS / POSSIBLE ADJUSTMENTS

- Net worth of CA$509,000 = total assets CA$668,000 - total liabilities CA$159,000. Consistent debt repayment and asset accumulation are the two primary levers.
- Debt-to-asset ratio of 23.8% (reference: 25% or lower for a healthy balance sheet). The largest single improvement action is paying down high-rate non-mortgage debt.
- Liquid assets (Cash + Savings: CA$35,000) represent 5.2% of total assets. Liquidity enables financial resilience -- low liquidity means being asset-rich but cash-poor.

METHODOLOGY

What this calculator models:

- Net worth = total assets - total liabilities. Liquid assets = Cash & Savings only.
- Debt-to-asset ratio = total liabilities / total assets x 100%. Liquidity % = Cash & Savings / total assets x 100%.
- Net Worth Health Score (0-100) based on debt-to-asset ratio: score = clamp(0, 100, 100 - D/A x 1.33). Liquidity Score based on liquid % of assets.

What this calculator does not model:

- Asset sale costs or transaction fees (real estate commissions, capital gains tax).
- Fair market value fluctuations -- assets are entered at user-estimated values.
- Debt repayment terms, interest rates, or minimum payments.
- Income or cash flow (net worth is a balance-sheet snapshot only).
- Pension or defined-benefit plan values not entered as assets.
- Insurance policy cash values.

EDUCATIONAL DISCLAIMER

This report is for educational and illustrative purposes only. Net worth is a balance-sheet estimate based on the values you entered and does not reflect market appraisals, tax obligations on asset sale, or all personal assets and liabilities. The 25% debt-to-asset and 10% liquidity thresholds are illustrative reference points only, not financial planning standards or regulatory requirements. This does not constitute financial, legal, or investment advice. Consult a qualified financial advisor for a comprehensive balance-sheet review.
