AI-ASSISTED INCOME TAX SUMMARY

Based on 2025 federal tax brackets and approximate Ontario (ON) flat rate for Canada, your estimated income tax on CA\$85,000 gross income is CA\$19,628 (23.1% effective rate). A Basic Personal Amount (BPA) non-refundable tax credit of CA\$2,419 reduces federal tax payable. Estimated after-tax income: CA\$65,372 (CA\$5,447.67/month). Take-Home Clarity Score: 91/100 (Low Deduction Load).

Federal income tax: CA\$11,850. Estimated Ontario (ON) tax: CA\$7,778. Total: CA\$19,628. Marginal federal rate at this income level: 20.5% (\$57,375 - \$114,750). The marginal rate applies only to income above the bracket threshold, not to all income.

This estimate uses 2025 federal brackets and an approximate flat provincial rate for educational illustration. It does not account for CPP/EI premiums, RRSP deductions, other tax credits, surtax, or province-specific deductions. Actual tax owing depends on your full tax return. File your return with CRA or consult a tax professional.

INPUTS & ASSUMPTIONS

Gross Income	CA\$85,000
Tax Year	2025
Province/Territory	Ontario (ON)
Region	Canada

DETAILED RESULTS

Gross Income	CA\$85,000
Federal Income Tax	CA\$11,850
Provincial Tax (Ontario)	CA\$7,778
BPA Tax Credit	- CA\$2,419
Est. Total Tax	CA\$19,628
Est. After-Tax Income	CA\$65,372
Monthly Take-Home	CA\$5,447.67
Effective Tax Rate	23.1%
Marginal Federal Rate	20.5%
Income Band	\$57,375 - \$114,750
Take-Home Clarity Score	91/100 (Low Deduction Load)

KEY DRIVERS / POSSIBLE ADJUSTMENTS

- Your effective tax rate of 23.1% reflects the blended average across all brackets -- not your marginal rate of 20.5%. The effective rate is what matters for overall tax burden comparison.
- Provincial tax adds CA\$7,778 (9.2% of gross income). Province selection significantly affects total tax -- this uses an approximate flat rate for education only.
- Your after-tax monthly income of CA\$5,447.67/month is the most actionable output for budgeting. Consider using this figure rather than gross income when planning fixed expenses or savings rates.

METHODOLOGY

What this calculator models:

- Applies 2025 Canada federal progressive tax brackets. Basic Personal Amount (BPA) non-refundable credit applied: $\min(\text{raw federal tax}, \text{BPA} \times 15\%)$, cannot reduce below zero. Provincial estimate uses a flat approximate rate applied to gross income.
- Effective tax rate = total tax / gross income. Marginal federal rate = federal rate bracket applying to the last dollar of gross income.
- Monthly take-home = $(\text{gross income} - \text{total tax}) / 12$. All estimates use the inputs entered and do not include payroll deductions beyond the tax amounts shown.

What this calculator does not model:

- CPP and EI premiums (payroll deductions separate from income tax).
- RRSP deductions that reduce taxable income.
- Progressive provincial tax brackets (approximate flat rate used for all provinces).
- Ontario surtax, Quebec abatement, or other province-specific rules.
- Other federal or provincial tax credits beyond the BPA.
- Capital gains, self-employment, rental, or investment income.
- Alternative minimum tax (AMT).

EDUCATIONAL DISCLAIMER

This report is for educational and illustrative purposes only. Tax estimates use 2025 approximate federal brackets and flat provincial rates. They do not constitute a tax return, tax filing advice, or CRA-approved calculations. Actual taxes depend on your full tax situation, deductions, and credits. File your T1 return with CRA or consult a qualified tax professional.
