Qualification

MONTHLY INCOME ALLOCATION (ESTIMATED)

Total projected: \$6,250.00

Monthly Housing: \$1,714.00 (27.4%) Other Debts: \$800.00 (12.8%) Remaining Income: \$3,736.00 (59.8%)

AI-ASSISTED MORTGAGE QUALIFICATION SUMMARY

Based on combined gross annual income of \$75,000, this scenario does not qualify under standard 28/36 CFPB guidelines. Your Front-End / Back-End DTI ratios are 27.4% / 40.2% against limits of 28% / 36%.

Your maximum estimated mortgage qualifying amount is \$182,000, resulting in a maximum estimated home price of \$222,000 with a \$40,000 down payment. Estimated monthly principal and interest: \$1,297.00/month. Total monthly housing costs (P&I + tax + heating): \$1,714.00/month.

To improve qualification: consider increasing your down payment, reducing existing monthly debt obligations (\$800/month currently), or increasing income. Reducing debts by \$200/month could meaningfully improve your TDS ratio. This is an estimated qualifying capacity based on the inputs provided. Actual mortgage qualification depends on your credit score, employment history, property type, and lender-specific underwriting criteria not modeled here.

INPUTS & ASSUMPTIONS

Annual Income (Primary)	\$75,000
Mortgage Rate	6.75%
Amortization	30 years
Down Payment	\$40,000
Annual Property Tax	\$5,000
Monthly Heating Costs	\$0.00
Monthly Car Payment	\$600.00
Credit Card Minimums	\$200.00
Region	United States

DETAILED RESULTS

Max Estimated Mortgage	\$182,000
Max Estimated Home Price	\$222,000
Monthly P&I Payment	\$1,297.00
Monthly Housing Total	\$1,714.00
Monthly Income	\$6,250.00
Total Monthly Debts	\$800.00
Front-End Ratio	27.4% (limit 28%)
Back-End DTI Ratio	40.2% (limit 36%)
GDS Pass	No
TDS Pass	No
Qualification Verdict	Does Not Qualify

KEY DRIVERS / POSSIBLE ADJUSTMENTS

- GDS ratio (27.4% vs 28% limit): Driven by your monthly housing costs of \$1,714.00. Reducing property tax assumptions or interest rate reduces GDS.
- TDS ratio (40.2% vs 36% limit): Driven by monthly housing costs plus \$800 in other monthly debts. Paying off a car loan or credit card before applying materially improves TDS.
- Down payment of \$40,000 (18.0% of max home price) is at or above 20% -- conventional (uninsured) mortgage limits apply.

METHODOLOGY

What this calculator models:

- Applies CFPB 28/36 front-end/back-end DTI guidelines. Front-end (housing ratio) limit: 28%. Back-end (total debt) limit: 36%. No stress test applied for the US.
- Solves for the maximum mortgage principal whose stress-test (CA) or contract-rate (US) P&I payment satisfies both ratio limits simultaneously.
- Maximum home price equals maximum mortgage plus down payment. Monthly P&I shown at contract rate for payment planning purposes.

What this calculator does not model:

- Credit score, employment history, or lender-specific underwriting overlays.
- Private mortgage insurance (PMI).
- Property condition, appraisal, or title issues.
- Variable-rate mortgage qualifying rules or fixed vs variable payment differences.
- Strata/condo fees (may be included by lenders in housing costs).
- Seasonal or irregular income treatment.

EDUCATIONAL DISCLAIMER

This report is for educational and illustrative purposes only and applies CFPB 28/36 qualification guidelines. Actual mortgage qualification depends on your lender, credit score, loan type, and current regulatory requirements. This does not constitute mortgage, financial, or legal advice. Verify qualification with a licensed mortgage professional or your financial institution.
