Total Assets: \$670,000 (73.6%) Total Liabilities: \$240,000 (26.4%)

AI-ASSISTED NET WORTH SUMMARY

Your balance sheet shows total assets of \$670,000 and total liabilities of \$240,000, resulting in a net worth of \$430,000. Debt-to-asset ratio: 35.8%. Liquid assets represent 6.7% of total assets. Net Worth Health Score: 52/100 (Fair).

Asset breakdown: Cash & Savings \$45,000 + Investments/Retirement \$180,000 + Home/Real Estate \$420,000 + Vehicles/Other \$25,000 = \$670,000. Liabilities: Mortgage \$220,000 + Loans/Credit Cards \$15,000 + Other Debts \$5,000 = \$240,000. Liquidity Strength: Moderate (6.7% liquid assets of total).

Your debt-to-asset ratio of 35.8% exceeds the 25% reference threshold. Reducing liabilities by \$72,500 would bring the ratio to 25%. Focus on your highest-rate debts first. These thresholds (25% D/A, 10% liquid) are educational reference points only -- not financial advice or regulatory standards. Actual balance sheet health depends on income, cash flow, asset type, and personal goals.

ASSETS & LIABILITIES ENTERED

Cash & Savings	\$45,000
Investments / Retirement	\$180,000
Home / Real Estate	\$420,000
Vehicles & Other Assets	\$25,000
Mortgage Balance	\$220,000
Loans & Credit Cards	\$15,000
Other Debts	\$5,000
Region	United States

Total Liabilities	\$240,000
Net Worth	\$430,000
Debt-to-Asset Ratio	35.8%
Liquid Assets	\$45,000
Liquid Assets %	6.7%
Net Worth Health Score	52/100 (Fair)
Liquidity Score	34/100 (Moderate)
Debt Reduction to 25% D/A	\$72,500

KEY DRIVERS / POSSIBLE ADJUSTMENTS

- Net worth of \$430,000 = total assets \$670,000 - total liabilities \$240,000. Consistent debt repayment and asset accumulation are the two primary levers.
- Debt-to-asset ratio of 35.8% (reference: 25% or lower for a healthy balance sheet). The largest single improvement action is paying down high-rate non-mortgage debt.
- Liquid assets (Cash + Savings: \$45,000) represent 6.7% of total assets. Liquidity enables financial resilience -- low liquidity means being asset-rich but cash-poor.

METHODOLOGY

What this calculator models:

- Net worth = total assets - total liabilities. Liquid assets = Cash & Savings only.
- Debt-to-asset ratio = total liabilities / total assets x 100%. Liquidity % = Cash & Savings / total assets x 100%.
- Net Worth Health Score (0-100) based on debt-to-asset ratio: score = clamp(0, 100, 100 - D/A x 1.33). Liquidity Score based on liquid % of assets.

What this calculator does not model:

- Asset sale costs or transaction fees (real estate commissions, capital gains tax).
- Fair market value fluctuations -- assets are entered at user-estimated values.
- Debt repayment terms, interest rates, or minimum payments.
- Income or cash flow (net worth is a balance-sheet snapshot only).
- Pension or defined-benefit plan values not entered as assets.
- Insurance policy cash values.

EDUCATIONAL DISCLAIMER

This report is for educational and illustrative purposes only. Net worth is a balance-sheet estimate based on the values you entered and does not reflect market appraisals, tax obligations on asset sale, or all personal assets and liabilities. The 25% debt-to-asset and 10% liquidity thresholds are illustrative reference points only, not financial planning standards or regulatory requirements. This does not constitute financial, legal, or investment advice. Consult a qualified financial advisor for a comprehensive balance-sheet review.
