EXECUTIVE SUMMARY

Healthy Growth

CA\$924,942

Projected RRSP Value

CA\$295,000

Total Contributions

CA\$629,942

Est. Tax-Deferred Growth

CA\$3,350

Est. Tax Reduction

82/100

RRSP Growth Score

Excellent

ESTIMATED RRSP BREAKDOWN

32%

68%

Total projected: CA\$924,942

Total Contributions: CA\$295,000 (31.9%)

Tax-Deferred Growth: CA\$629,942 (68.1%)

AI-ASSISTED RRSP GROWTH SUMMARY

Based on a starting RRSP balance of CA\$45,000, a one-time contribution of CA\$10,000, and CA\$800.00/month over 25 years at 7% assumed return, your projected RRSP value is CA\$924,942. Estimated tax reduction on the first-year contribution: CA\$3,350 (simplified estimate at 33.5% marginal rate). RRSP Growth Score: 82/100 (Excellent).

Your projected CA\$924,942 consists of approximately CA\$295,000 in contributions and CA\$629,942 in estimated tax-deferred growth. Milestone projections at 7% return: CA\$245,035 at year 10, CA\$618,862 at year 20, CA\$924,942 at year 30. Your planned first-year contribution of CA\$19,600 uses 78.4% of your entered available RRSP room of CA\$25,000.

RRSP contributions reduce your taxable income in the year of contribution, and growth is tax-deferred until withdrawal. This projection does not model RRSP-to-RRIF conversion requirements, withdrawal taxes, spousal RRSP rules, or the Home Buyers' Plan / Lifelong Learning Plan. Verify your available deduction room via your CRA Notice of Assessment or CRA My Account.

INPUTS & ASSUMPTIONS

Current Balance	CA\$45,000
Available RRSP Room	CA\$25,000
One-Time Contribution	CA\$10,000
Monthly Contribution	CA\$800.00/month
Assumed Annual Return	7%
Compound Frequency	Monthly
Investment Horizon	25 years
Marginal Tax Rate	33.5%
Region	Canada

DETAILED RESULTS

Projected RRSP Value	CA\$924,942
Total Contributions	CA\$295,000
Est. Tax-Deferred Growth	CA\$629,942
Planned First-Year Contributions	CA\$19,600
RRSP Room Used	78.4%
Over Room?	No
Est. Tax Reduction	CA\$3,350
Value at Year 10	CA\$245,035
Value at Year 20	CA\$618,862
Value at Year 30	CA\$924,942
RRSP Growth Score	82/100 (Excellent)

KEY DRIVERS / POSSIBLE ADJUSTMENTS

- Compounding over 25 years is the primary growth driver. At 7%, funds approximately double every 10 years (Rule of 72). Starting earlier or extending the horizon compounds this effect.
- Monthly contributions of CA\$800.00/month accumulate to CA\$240,000 over 25 years before growth. Increasing contributions by CA\$100.00/month adds approximately CA\$30,000 in additional invested capital.
- Your room usage of 78.4% leaves CA\$5,400 in unused RRSP room this year. Unused room does not expire but using it defers more tax-advantaged growth.

METHODOLOGY

What this calculator models:

- Calculates projected RRSP value using compound interest with an effective monthly rate derived from the selected compound frequency and annual rate. Starting balance plus a one-time contribution plus monthly contributions compounds over the selected horizon.
- First-year room check: compares planned one-time plus 12 months of contributions against entered available room. Over-contribution warning fires when planned exceeds available room. This is an estimate -- actual CRA room may differ.
- Estimated tax reduction: first-year contribution (capped at available room) multiplied by the entered marginal tax rate. This is a simplified estimate and does not account for marginal rate changes, RRSP carry-forward, or other tax credits.

What this calculator does not model:

- CRA exact deduction room (enter manually from Notice of Assessment).
- RRSP-to-RRIF conversion at age 71 and RRIF minimum withdrawals.
- Taxes owing on RRSP/RRIF withdrawals in retirement.
- Spousal RRSP accounts.
- Home Buyers' Plan (HBP) or Lifelong Learning Plan (LLP) withdrawals.
- Investment fees or MERs on growth returns.
- Provincial tax rates or provincial tax credits.

EDUCATIONAL DISCLAIMER

This report is for educational and illustrative purposes only. The RRSP projection uses a fixed assumed return and does not reflect actual CRA deduction room, taxes on withdrawals, RRIF conversion rules, or spousal RRSP considerations. The estimated tax reduction is a simplified estimate and not a guarantee. Verify your available deduction room via your CRA Notice of Assessment. This does not constitute financial, tax, or legal advice. Consult a qualified tax professional.
