SALES TAX CALCULATION SUMMARY

Adding 13% sales tax for Ontario (ON) (HST 13%) to CA\$500.00 yields a total of CA\$565.00. Tax amount: CA\$65.00 (11.5% of total price).

Canada sales tax varies by province and commodity type. GST (5%) applies federally; provinces add PST, HST, or QST on top. Sales tax share of total price: 11.5%.

This calculation applies a single combined rate and does not account for tax-exempt goods, reduced rates, municipal surtaxes, or commodity-specific rules. For business remittance, input tax credits, or formal compliance purposes, consult a tax professional or the relevant tax authority.

INPUTS & ASSUMPTIONS

Calculation Mode	Add Tax
Amount Entered	CA\$500.00
Tax Rate	13%
Province/Territory	Ontario (ON)
Region	Canada

DETAILED RESULTS

Pre-Tax Amount	CA\$500.00
Total Tax	CA\$65.00
Total with Tax	CA\$565.00
Tax Share	11.5% of total
Combined Rate	13%

KEY DRIVERS / POSSIBLE ADJUSTMENTS

- Tax rate of 13% adds CA\$65.00 to a CA\$500.00 pre-tax price. Rate changes have a proportional and immediate effect on the tax amount.
- Tax share is 11.5% of the total price -- useful for understanding the consumer burden.
- When comparing prices across provinces or states, use the "Remove Tax" mode to determine the pre-tax base and then apply the rate for your jurisdiction.

METHODOLOGY

What this calculator models:

- Add Tax mode: $\text{tax} = \text{pre-tax amount} \times (\text{rate} / 100)$. $\text{Total} = \text{pre-tax} + \text{tax}$.
- Remove Tax (Reverse) mode: $\text{pre-tax} = \text{total amount} / (1 + \text{rate} / 100)$. $\text{Tax} = \text{total} - \text{pre-tax}$.
- Canada province presets use combined GST/HST/PST/QST rates. Components shown separately when a province has multiple tax types. Last-component remainder pattern prevents floating-point drift.

What this calculator does not model:

- Tax-exempt or zero-rated goods (groceries, prescription drugs, medical devices in most jurisdictions).
- Municipal or county surtaxes beyond the entered rate.
- Small supplier thresholds or GST/HST registration requirements.
- Quebec QST input tax refunds (ITRs) for businesses.
- Alcohol, tobacco, cannabis, or luxury tax surcharges.
- Business sales tax compliance or remittance requirements.

EDUCATIONAL DISCLAIMER

This report is for educational and illustrative purposes only. Sales tax rates and rules change frequently. This calculator uses a single combined rate and does not reflect all exemptions, special categories, or local surcharges. For business remittance, compliance, or formal tax advice, consult a qualified tax professional or the relevant tax authority.
