56%

Total projected: CA\$366,739

Total Contributions: CA\$161,000 (43.9%)

Tax-Free Growth: CA\$205,739 (56.1%)

AI-ASSISTED TFSA GROWTH SUMMARY

Based on a starting TFSA balance of CA\$35,000, a one-time contribution of CA\$6,000, and CA\$500.00/month over 20 years at 6% assumed return, your projected TFSA value is CA\$366,739. All growth is estimated to be tax-free on withdrawal. TFSA Growth Score: 62/100 (Fair).

Your projected CA\$366,739 consists of approximately CA\$161,000 in contributions and CA\$205,739 in estimated tax-free growth. Milestone projections at 6% return: CA\$154,661 at year 10, CA\$366,739 at year 20, CA\$722,740 at year 30. Your planned first-year contribution of CA\$12,000 uses 25.0% of your entered available TFSA room of CA\$48,000.

TFSA contribution room accumulates each year regardless of income. Withdrawals are re-added to your available room the following January 1. This projection does not model future room accumulation, withdrawals and recontributions, or investment fees. Actual CRA TFSA room may differ from the amount entered here -- verify via CRA My Account.

INPUTS & ASSUMPTIONS

Current Balance	CA\$35,000
Available TFSA Room	CA\$48,000
One-Time Contribution	CA\$6,000
Monthly Contribution	CA\$500.00/month
Assumed Annual Return	6%
Compound Frequency	Monthly
Investment Horizon	20 years
Region	Canada

DETAILED RESULTS

Projected TFSA Value	CA\$366,739
Total Contributions	CA\$161,000
Est. Tax-Free Growth	CA\$205,739
Planned First-Year Contributions	CA\$12,000
TFSA Room Used	25.0%
Over Room?	No
Value at Year 10	CA\$154,661
Value at Year 20	CA\$366,739
Value at Year 30	CA\$722,740
TFSA Growth Score	62/100 (Fair)

KEY DRIVERS / POSSIBLE ADJUSTMENTS

- Compounding over 20 years is the primary growth driver. At 6%, funds approximately double every 12 years (Rule of 72). Starting earlier or extending the horizon compounds this effect.
- Monthly contributions of CA\$500.00/month accumulate to CA\$120,000 over 20 years before growth. Increasing contributions by CA\$100.00/month adds approximately CA\$24,000 in additional invested capital.
- Your room usage of 25.0% leaves CA\$36,000 in unused TFSA room this year. Unused room does not expire and accumulates annually.

METHODOLOGY

What this calculator models:

- Calculates projected TFSA value using compound interest with an effective monthly rate derived from the selected compound frequency and annual rate. Starting balance plus a one-time contribution plus monthly contributions compounds over the selected horizon.
- First-year room check: compares planned one-time plus 12 months of contributions against entered available room. Over-contribution warning fires when planned exceeds available room. This is an estimate -- actual CRA room may differ.

What this calculator does not model:

- CRA exact contribution room (enter manually from CRA My Account).
- Future room accumulation from annual limit increases.
- Withdrawals and re-contribution to room the following year.
- Investment fees, MERs, or tax drag on growth.
- Spousal TFSA accounts.
- US persons subject to FBAR or IRS TFSA reporting requirements.

EDUCATIONAL DISCLAIMER

This report is for educational and illustrative purposes only. The TFSA projection uses a fixed assumed return and does not reflect actual CRA contribution room, future annual limits, or taxes on over-contributions. Verify your available TFSA room via CRA My Account before contributing. This does not constitute financial, tax, or legal advice. Consult a qualified tax professional regarding your TFSA eligibility and room.
